

THE

Coffee Tasting Journal

*Track every cup.
Discover your palate.*

A printable companion for the curious drinker — log your
brews, map your flavors, and watch your palate sharpen,
one cup at a time.

🌲 PRINT AT HOME · FILL BY HAND 🌲

How to Use This Journal

Great tasting is a skill, and skills grow with practice. Brew a cup, slow down, and write it down. Over weeks you'll start noticing patterns — the roasts you love, the origins that surprise you, the ratios that sing.

- 1 **Brew & sip.** Make your coffee however you like it, then take a moment before your first sip to smell it.
- 2 **Slurp & notice.** Slurp to spread the coffee across your tongue. Ask: is it bright or mellow? light or heavy? What does it remind you of?
- 3 **Log it.** Fill in a Tasting Log page. Use the Flavor Wheel when words won't come. Rate it, and note if you'd buy it again.
- 4 **Review.** At month's end, fill in the Monthly Favorites page and watch your palate take shape.

"Nature calls, coffee answers."

Anatomy of a Tasting

AROMA

Smell before you sip — most of "taste" is smell. Floral? Fruity? Toasty? Nutty?

ACIDITY

The bright, lively tingle. A good thing — think crisp apple or citrus, not sourness.

BODY

The weight in your mouth — from tea-light to syrupy and full.

SWEETNESS

Natural sugars — caramel, honey, chocolate, ripe fruit.

FINISH

What lingers after you swallow. Short or long? Clean or drying?

BALANCE

How the parts play together. Does any one thing shout over the rest?

RATE EACH ON A 1-5 SCALE AS YOU TASTE

The Flavor Wheel

Start at the center and work outward. Is it *fruity* or *roasty*? Then get specific — fruity like *berry*, or like *citrus*?
The more you name, the more you taste.

FRUITY

Berry, cherry, citrus, apple, tropical

FLORAL

Jasmine, rose, chamomile, honeysuckle

SWEET

Caramel, honey, brown sugar, maple

NUTTY

Almond, hazelnut, peanut, walnut

COCOA

Milk chocolate, dark chocolate, cacao

SPICE

Cinnamon, clove, nutmeg, pepper

ROASTY

Toast, tobacco, cedar, smoke

HERBAL

Grassy, minty, sage, green apple

Tip: cup two coffees side by side — contrast makes flavors obvious.

Brew Ratio Tracker

STARTING POINTS (A RATIO OF 1:16 = 1G COFFEE TO 16G WATER)

METHOD	RATIO	GRIND	WATER	TIME
Pour-over (V60)	1:16	Medium	200°F	2:30–3:30
Chemex	1:16–1:17	Med-coarse	200°F	3:30–4:30
French press	1:15	Coarse	200°F	4:00
AeroPress	1:14–1:16	Med-fine	185–200°F	1:00–2:00
Espresso	1:2	Fine	200°F	25–32s
Cold brew	1:8	Extra coarse	Cold	12–18 hr

YOUR EXPERIMENTS — WHAT WORKED, WHAT DIDN'T

COFFEE	METHOD	RATIO	GRIND	RESULT / TWEAK NEXT TIME

Too bitter? coarser. Too sour or weak? finer.
